# Rahul Mishra

Senior Flutter Developer | Immediate Joiner

Panchkula, Haryana • +91 9814941771 • beingmishra.dev@gmail.com • beingmishra.github.io

## SUMMARY

Flutter developer with 5+ years building production Android and iOS applications across logistics, fintech, and mobility, including vendor lead-management and customer-onboarding platforms with workflows adjacent to CRM systems. Strong background in BLoC architecture, REST API and third-party SDK integration, and full app lifecycle ownership from design through Play Store and App Store release. Available to join immediately.

## WORK EXPERIENCE

### Flutter Developer — Big Wings LLC
July 2024 – October 2026

*Mohali, Punjab*

- Developed 3 production Flutter applications — a driver app, a Transportation Management System (TMS) app, and an internal enterprise logistics app — within a 10–15 person engineering team.
- Architected scalable Flutter applications using BLoC state management, improving code maintainability and application performance across the product suite.
- Integrated the HERE Maps SDK with turn-by-turn navigation, route optimization, dynamic rerouting, and real-time trip visualization.
- Implemented an offline-first sync feature in the TechTrucker driver app, letting drivers complete trip and stop workflows without connectivity and automatically syncing queued actions once the internet is restored.
- Owned release quality across phone and tablet form factors, and personally managed releases to both the Apple App Store and Google Play Store.
- Collaborated with backend engineers, QA, and product teams from requirement analysis through production deployment.

### Flutter Developer — Figgo Innovations
April 2022 – July 2024

*Zirakpur, Punjab*

- Transitioned from native Android development into Flutter, building cross-platform applications across taxi, fintech, education, and enterprise domains.
- Built lead-management and customer-onboarding workflows for a vendor platform (Unique Idea) — tracking leads, generating reports, and managing vendor-customer relationships end-to-end, conceptually adjacent to CRM-style systems.
- Reduced development time by 40% by building reusable widgets and a modular, clean-architecture component library adopted across multiple products.
- Integrated 7 third-party SDKs — Google Maps, PhonePe, Firebase, AdMob, Appodeal, AppsFlyer, and Agora — to power payments, location, advertising, and real-time voice/video.
- Improved bug resolution rate by 62.5% through UI performance optimization and refactoring toward cleaner, modular architecture.

### Android Developer — Extech Digital
January 2022 – April 2022

*Mohali, Punjab*

- Built and upgraded native Android applications using Java, Kotlin, and Android Studio, reducing time-to-market by 25% through adherence to coding best practices.

### Android Developer (Freelance) — Independent
August 2021 – December 2021

*Panchkula, Haryana*

- Built and shipped 3 end-to-end Android applications in Java and Kotlin, integrating REST APIs and Firebase backend services, reaching 1,000+ combined installs.

## SKILLS & TECHNOLOGIES

**Core:** Flutter • Dart • Android SDK • Java • Kotlin • Jetpack Compose • Swift (basics)
**Architecture & Patterns:** BLoC • MVVM • Clean Architecture • Riverpod • GetX • REST APIs
**Integrations:** HERE Maps SDK • Google Maps SDK • Firebase • Payment Gateways (PhonePe) • Real-Time Voice/Video SDKs
**Data & Storage:** SQLite • Hive • Floor • Room • SwiftData • PostgreSQL • Firebase • Supabase
**Tools & Release:** Android Studio • Git • Docker • App Store & Play Store Release Management

## OPEN SOURCE

**Octavi OS** — AOSP-based custom Android ROM with 6,600+ users at a 15% monthly growth rate; ships monthly security patches and performance optimizations.

## EDUCATION

**Panjab University, Chandigarh** — BCA, 2020 | **Industrial Training Institute, Chandigarh** — 2017
